

Vadodara Institute of Engineering

MIA ATL Report for Phase -1 (9-1-2026 to 8-4-2026)

Name of School	Bright Day school, Bhayli
Principal of School	Bhavik Parekh
Nodal Teacher of School	Pallavi Chauhan
RMOC	Mr. Rajkumar Mathur
VIER Mentor Faculty	Mili Patel
Core Team Leader	Jayraj Chavda
VIER Interns	(1) Palak Patel (2) Honey Bakeriwala (3) Kavya Trivedi
Total ATL visit days	(1) 3 (2) 3 (3) 0
Total Atal sessions	(1) 3 (2) 3 (3) 0
(A) Projects	
Titles & Objectives	Educate students on how Internet of Things (IoT) technology is used across various fields such as healthcare, agriculture, smart homes, and industries to collect data, automate processes, and improve efficiency.
Use of Hardware/ Components / Tools	1. Arduino Uno is used to process data from sensors and control the overall system operations in IoT projects. 2. NodeMCU ESP8266 enables wireless communication, allowing data to be sent to cloud platforms for real-time monitoring. 3. Sensors collect real-world data such as temperature, light, and motion, which helps in automation and smart decision-making systems.
Use of Software	1. Arduino IDE is used to write and upload code to microcontrollers, helping students build and control IoT projects. 2. Code.org helps students learn basic programming concepts through interactive activities, forming a foundation for developing IoT applications.
Suggestions / Improvement / Solution provided	1. Smart Water Level Indicator Monitors water tank levels and sends alerts when it is full or empty. 2. Gas Leakage Detection System Detects gas leaks and triggers an alarm to ensure safety at home or in industries.

	3. Smart Energy Meter Tracks electricity usage and displays real-time consumption data. 4. Fire Detection System Uses smoke and temperature sensors to detect fire and send alerts instantly.
(B) Innovative topics / technologies discussed: Artificial Intelligence , Machine Learning	

Name & Sign of VIER Mentor Faculty with date: Mili Patel 20/4/2026
