

Vadodara Institute of Engineering

MIA ATL Report for Phase -1 (9-1-2026 to 8-4-2026)

Name of School	Rosary High School
Principal of School	Dipak sir
Nodal Teacher of School	Indravadan Tandel sir
RMOC	Dr. Sudhir Joshi
VIER Mentor Faculty	Mili Patel
Core Team Leader	Jayraj Chavda
VIER Interns	(1) Tanish Badkas (2) Yashkia Gurav (3) Sai Rawal
Total ATL visit days	(1) 2 (2) 1 (3) 1
Total Atal sessions	(1) 2 (2) 1 (3) 1
(A) Projects	
Titles & Objectives	Enlighten students about how the Internet of Things (IoT) is used in various fields such as healthcare, agriculture, smart homes, and industries, enabling real-time data collection, automation, improved efficiency, and smarter decision-making in everyday life.
Use of Hardware/ Components / Tools	1. Arduino Uno is used to read and process data from sensors, acting as the main controller in IoT projects. 2. NodeMCU ESP8266 enables internet connectivity, allowing devices to send and receive real-time data. 3. Sensors collect environmental data such as temperature, light, and motion, which is used to automate systems and make smart decisions.
Use of Software	1. Arduino IDE is used to develop and upload code to microcontrollers, enabling students to build and control IoT-based projects. 2. Code.org helps students learn coding fundamentals through interactive lessons, preparing them to create real-world IoT applications.
Suggestions / Improvement / Solution provided	Make real life projects 1. Smart Attendance System Uses RFID or biometric sensors to automatically record attendance.

	2. Air Quality Monitoring System Measures pollution levels and displays air quality data in real time. 3. Smart Door Lock System Allows access control using passwords, RFID cards, or mobile apps.
(B) Innovative topics / technologies discussed: Artificial Intelligence , Machine Learning	

Name & Sign of VIER Mentor Faculty with date: Mili Patel 20/04/2026
