

# Vadodara Institute of Engineering

## MIA ATL Report for Phase -1 (9-1-2026 to 8-4-2026)

|                                                                                                  |                                                                                   |
|--------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Name of School                                                                                   | Baroda HighSchool Alkapuri                                                        |
| Principal of School                                                                              | Me. Ashish Malhotra                                                               |
| Nodal Teacher of School                                                                          | Chandrawadan K. Makwana                                                           |
| RMOC                                                                                             | Sudhir Joshi                                                                      |
| VIER Mentor Faculty                                                                              | Pratik Kahar                                                                      |
| Core Team Leader                                                                                 | Jayraj Chavda                                                                     |
| VIER Interns                                                                                     | (1) Ved Kachhiya<br>(2) Nidhi Patel<br>(3) Nidhi Patel                            |
| Total ATL visit days                                                                             | (1) 8<br>(2) 4<br>(3) 3                                                           |
| Total Atal sessions                                                                              | (1) 8<br>(2) 3<br>(3) 2                                                           |
| <b>(A) Projects</b>                                                                              |                                                                                   |
| Titles & Objectives                                                                              | IOT applications<br>To learn the basics of electronic devices for IOT application |
| Use of Hardware/ Components / Tools                                                              | Sensors, microcontrollers                                                         |
| Use of Software                                                                                  | Arduino, AI based Google Teacher                                                  |
| Suggestions / Improvement / Solution provided                                                    | Everything was good more equipment needed                                         |
| <b>(B) Innovative topics / technologies discussed:</b><br><b>Home Automation, Car Automation</b> |                                                                                   |
