

VADODARA INSTITUTE OF ENGINEERING

Lab Planning – Practical

Subject: Object oriented programming
Discipline: DE
Academic Year: 2025-2026
Employee code: 25CH0587

Subject Code: DI04000021
Semester: 4th
Name of Faculty: Naman Shah
Total no of lab planned: 14

Teaching and Examination Scheme:

Teaching Scheme			Credits	Examination Marks					Total Marks
L	T	P	C	Theory Marks		Practical Marks			
				ESE (E)	PA (M)	ESE (V)		PA (I)	
					PA	ESE	OEP		
3	0	2	4	70	20	20	10	20	150

L- Lectures, T-Tutorial, P-Practical; C-Credit; ESE- End Semester Exam; PA- Progressive Assessment

Lab Turn on:	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
					√	

Lab. No.	Practical Covered	Planned Date	Actual Date	HOD's Sign	Remarks
1.	Create simple programs in Java. a. Create a Java program to print “Hello World”, then compile, debug and execute it using Java compiler and interpreter. b. Create a Java program to perform arithmetic operations and demonstrate type casting.	02/01/26			
2.	Create Java programs using control structures. a. Create a Java program to find maximum of three numbers. b. Create a Java program to find sum of digits of a number	09/01/26			
3.	Create Java programs using arrays. a. Create a Java program to find sum and average of array elements. b. Create a Java program to perform addition of two matrices.	16/01/26			
4.	Create a Student class with fields and methods in Java program. Demonstrate object creation and method calling.	23/01/26			
5.	Create Java programs using constructor, this and static keywords. a. Create a Java program to demonstrate default and parameterized constructors and the use of ‘this’ keyword. b. Create a Java program to demonstrate different uses of ‘static’ keyword.	30/01/26			
6.	Create a Java program to demonstrate method overloading.	06/02/26			

VADODARA INSTITUTE OF ENGINEERING

7.	Create a Java program to perform various String operations of using built-in String methods.	13/02/26			
8.	Create a Java program to accept input using the Scanner class, store values and demonstrate autoboxing and unboxing	20/02/26			
9.	Create a Java program to demonstrate single and multilevel inheritance. (e.g., class Person → Employee → Manager)	27/02/26			
10	Write a Java practical to declare a 1D array of 10 integers, accept values from the user, and find the maximum, minimum, sum, and average of all elements.	06/03/26			
11	Write a Java practical to create a Student class with fields name, roll number, and marks using a parameterized constructor and a display() method to print details of multiple student objects.	13/03/26			
12	Write a Java practical to demonstrate inheritance and method overriding by creating a parent class Animal and a child class Dog that overrides the sound() method using the super keyword.	20/03/26			
13	Write a Java practical to demonstrate the Collections Framework by creating an ArrayList of student names to perform add, remove, and search operations and a HashSet to store and display unique roll numbers using a for-each loop.	27/03/26			
14	Write a Java practical to calculate the percentage of a student based on marks of 5 subjects and display the corresponding grade using if-else ladder control structure.	27/03/26
