

BE sem 6

MAD Assignment 1

1. Explain the key features of the Android operating system and why it became popular for mobile development.
2. What are the major components of an Android application? Describe each component briefly.
3. What is the purpose of the AndroidManifest.xml file? Explain at least three types of information it contains.
4. Describe the role of Activities and Intents in Android. How do they help in navigating between screens?
5. What are Fragments in Android? Explain how they differ from Activities and when they are typically used.
6. Define View and ViewGroup in Android. How do they work together to build user interfaces?
7. What is the function of AdapterView in Android? Give examples of UI elements that use adapters.
8. What are the different data storage options available in Android? Briefly explain any three of them.
9. Explain the purpose of a Content Provider in Android. When would you use it?
10. What is the difference between internal and external storage in Android? Discuss their advantages and limitations.
